Professional Experience

AndMine | Intern | June 2024 – December 2024

- CRM | Front-end

  Responsibilities:
  - A Frontend Developer Intern at AndMine (Jun–Dec 2024), worked on the in-house CRM, building responsive React + Material UI views for contact management, sales pipelines, and reports.
  - I created reusable table and form components with validation, integrated REST APIs, improved accessibility and performance, and collaborated with designers and backend engineers to ship features end-to-end.
- UX-UI | Figma

  Responsibilities:
  - Collaborated with designers as a UX-UI intern, using Figma to create wireframes, interactive prototypes, and design systems, ensuring consistent and user-friendly interfaces for web applications

Education

April 2025 – August 2025

Udemy - Online Course

Full Stack Web Development

March 2019 – November 2023

Academy of Interactive Technology - Australia

Bachelor of Information Technology (Mobile Application)

November 2017 – November 2018

James Cook University - Singapore

Diploma of Information Technology (Computer Science)

Skills

- HTML5, CSS3
- JavaScript, TypeScript
- ReactJS, Material-UI, Tailwind CSS
- NodeJS
- SQL Database, MongoDB
- GitHub

Personal Projects

Trello – Full Stack Website project. Outcome:

- Built a project management web app inspired by Trello using React, Node.js, Express, and MongoDB.
- Implemented user authentication, board and card CRUD operations, drag-and-drop functionality and real-time update
- Integrated file upload for board cover images with Multer and Cloudinary, storing secure image URLs.
- Developed RESTful APIs with advanced search and filtering using dynamic query parameters.
- Used React Hook Form and Material UI for robust, user-friendly forms and UI components.
- Applied authentication and authorization for user registration, login and protected route.
- Applied best practices for error handling, code structure, and asynchronous operations.

WeConnect – Frontend project. Outcome:

- Developed a real-time video calling feature using WebRTC and Socket.io for seamless peer-to-peer communication.
- Implemented state management and API integration with Redux Toolkit for scalable and maintainable code.
- Built reusable React components and context providers to manage authentication, call signalling, and media streams.
- Collaborated in an agile team to deliver new features and optimise user experience

Portfolio – Frontend project. Outcome:

- Designed and developed a responsive personal portfolio website using React and Material UI.
- Showcases projects, skills, and contact information with interactive features such as a carousel and contact form.
- Integrated EmailJS for direct messaging and ensured cross-device compatibility.
- Demonstrates proficiency in modern frontend technologies and UI/UX best practices.
